

Later Blooming Magnolias

With this crazy spring weather we've been having, many of the early blooming Magnolias like the 'Merrill' and 'Royal Star' have already bloomed, and are now dropping or have lost their petals.

I like the later blooming yellow Magnolias like 'Butterflies', because they're seldom hit by frost and inclement weather. We carry them in a tree form #10 container at a very reasonable price.

Another good later choice is *Magnolia virginiana*, the Sweetbay Magnolia, normally blooming around June 1st. I like this selection for the strong fragrance of its flowers.
