Well, it's hard to believe that it's October already, seems like just yesterday that it was March and it was below zero and snowing!!! (OK let's forget that and move on). However once everyone got going, there seemed to be no letup in the season. We still have 6-8 weeks to go, and we intend to help you finish your season strong. If you could look at our receiving board (the number of incoming trucks that our receiving staff has to handle, and you have to dodge when they pull in the wrong gate) it looks more like June than October.

We are continuing to inventory the nursery with the product that you need to finish this busy season with a flourish. So the loads continue to “grow”, from all points of the compass so that you, our customer can “grow” your profits this fall and into the 2015 season.

Fresh shade and ornamental trees are still a couple of weeks away, so watch for those loads as they start to arrive around the middle of October.

“We really do not grow anything around here... except trucks.”

Mike Evans
