

FRENCH DRAINS SIMPLIFIED

EZFLOW is a new product from NDS that makes installing french drains as easy as 1,2,3.

EZFLOW is a 10' long slotted drain pipe surrounded by a geotextile mesh, filled with Poly Rock. It has excellent structural integrity to resist compaction. There is no need to haul gravel to the site and wheelbarrow it to the trench saving labor and time. Just lay pipe in the trench and cover.

EZFLOW also gives excellent drainage behind retaining walls or drainage around foundations.

EZFLOW is light weight and easy to handle. Ten foot sections can be connected using a coupler or cut to any length and tie off mesh to secure poly rock.

EZFLOW Poly Rock is 100% recycled content.
